Work Disability in the United States: A Chartbook

Data from the Social Security Administration's most recent survey of the disabled in 1978 are presented in this publication. Like the 1977 edition, this chartbook presents information on demographic characteristics, disabling conditions, employment status, and income situation of noninstitutionalized disabled adults. New or expanded data include disability by sex and ethnic (Spanish) origin, disabilities caused by accidents and bad working conditions, extent of sensory limitations among disabled persons, and receipt of public income maintenance by the disabled and their families. Work Disability in the United States: A Chartbook

Data from the Social Security Administration's most recent survey of the disabled in 1978 are presented in this publication. Like the 1977 edition, this chartbook presents information on demographic characteristics, disabling conditions, employment status, and income situation of noninstitutionalized disabled adults. New or expanded data include disability by sex and ethnic (Spanish) origin, disabilities caused by accidents and bad working conditions, extent of sensory limitations among disabled persons, and receipt of public income maintenance by the disabled and their families. Work Disability in the United States: A Chartbook

Data from the Social Security Administration's most recent survey of the disabled in 1978 are presented in this publication. Like the 1977 edition, this chartbook presents information on demographic characteristics, disabling conditions, employment status, and income situation of noninstitutionalized disabled adults. New or expanded data include disability by sex and ethnic (Spanish) origin, disabilities caused by accidents and bad working conditions, extent of sensory limitations among disabled persons, and receipt of public income maintenance by the disabled and their families. Work Disability in the United States: A Chartbook

Data from the Social Security Administration's most recent survey of the disabled in 1978 are presented in this publication. Like the 1977 edition, this chartbook presents information on demographic characteristics, disabling conditions, employment status, and income situation of noninstitutionalized disabled adults. New or expanded data include disability by sex and ethnic (Spanish) origin, disabilities caused by accidents and bad working conditions, extent of sensory limitations among disabled persons, and receipt of public income maintenance by the disabled and their families.
